

CASE STUDY: Pinnacle Homes at Rocky Ridge

The Pinnacle Homes at Rocky Ridge is a premier community managed by Colonial Properties Trust. Because of its tenant density and need for unit availability, it was of the utmost importance that the affected unit (wherein a suicide had occurred) be restored to its pre-incident condition as soon as possible.

As soon as a call was received, the Biotrauma Emergency Service Team was dispatched to begin the decontamination process. Protease enzymes and Virkon (hospital grade disinfectants) were utilized in order to ensure the safest results. Following the treatment, our Master Certified Technician inspected the unit from top to bottom before approving departure. **A Certificate of Treatment was subsequently issued to the property manager to serve as a transfer of liability from Colonial Properties Trust to Biotrauma, Inc. concerning any post-treatment exposure incidents.**
